

Motorola Spectra System 9000 Siren

How to install ?

- Open 'OpenIV' and go to your GTA V Directory.
- In 'OpenIV', go to the 'x64' folder, then audio > sfx > resident.rpf
- Inside Resident.rpf should be 16 .awc files. Locate 'VEHICLES.AWC'
- Right click on it, and select 'EXTRACT TO WAVE (.WAV)' AND 'EXPORT TO OPENFORMATS (.OAC)' to an empty folder on your desktop.
- Using your desired siren trait names, rename any of the Motorola Spectra System 9000 Siren, and drag them to the vehicle.awc folder to replace the stock siren tones.
- Using 'OpenIV', click EDIT and then select ' Import OpenFormats', select your vehicles.oac to import the new sirne tones.
- Respond Code 3 !
